

HydroBloom 8mm

Installation Instructions

Option 1: Single dripline with branches

- Place the dripline (2) according to your garden layout.
- Connect the dripline to the valve (A) with 8x1/2" insert adaptor (1).
- For branches from the dripline, use an insert tee (3).
- For acute bending, use an insert elbow (4).
- When connecting two dripline sections, use an insert coupling (5).
- Turn on the valve (A) and flush the driplines.
- Fold and secure the dripline ends with rings (6).

Legend:

- * A* Existing 1/2" valve
- 1. 1/2" Insert adaptor
- 2. HydroBloom 8 mm dripline
- 3. Insert tee
- 4. Insert elbow
- 5. Insert coupling
- 6. Line end, 16 mm ring

* Not included in the kit

① 1/2" Insert adaptor

③ Insert tee

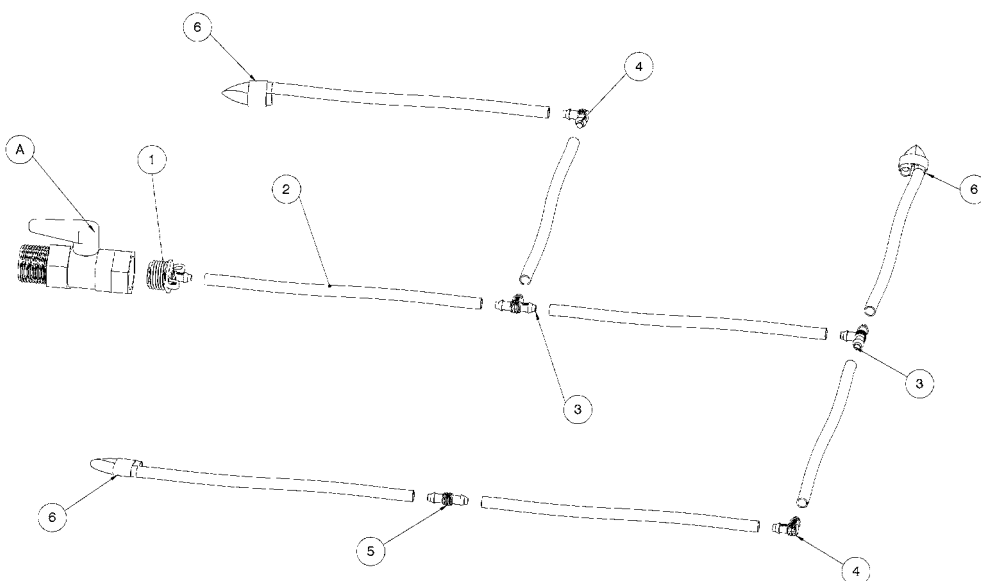

④ Insert elbow

⑤ Insert coupling

* ⑥ Line end, 16 mm ring

Maintenance:

- Max. operating pressure: 2.0 bar
- Open the dripline ends and flush them regularly.

HydroBloom 8mm

Installation Instructions

Option 2: Several 8 mm driplines branched from a 16 mm submain tube:

- Connect the submain (D) to the filter (B) with 1 6x3/4" adaptor (C).
- Place the driplines according to your garden layout.
- Punch holes in the submain for the driplines. Use the 3.7 mm mini punch inserter.
- Connect the driplines (2) to the submain (D) with an insert coupling (5).
- Connect the two opposite driplines to the submain with an insert tee (3).
- For acute bending, use an insert elbow (4).
- Flush the driplines, fold and secure their ends with rings (6).

③ Insert tee

④ Insert elbow

⑤ Insert coupling

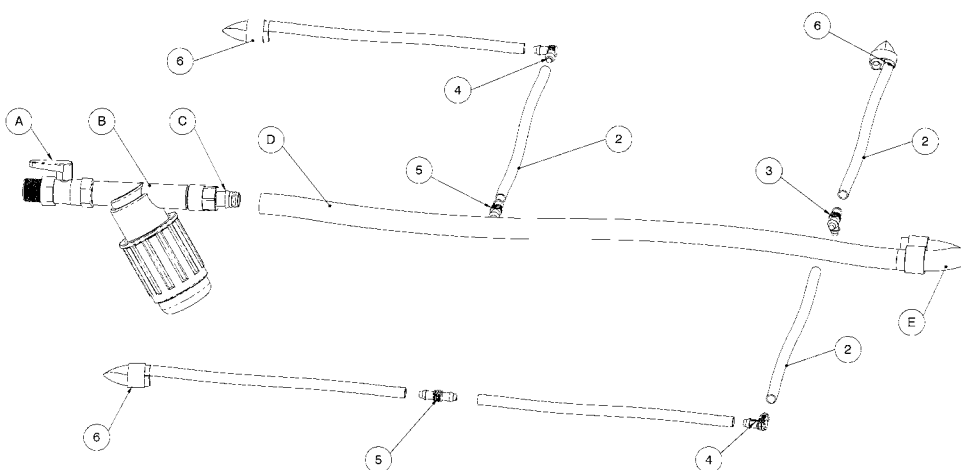

* ⑥ Line end, 16 mm ring

Legend:

- * A* 3/4" valve
- * B* 3/4" filter
- * C* 1 6x3/4" adaptor
- * D* 16 mm tube (submain)
- * E* Line end, 16 mm clamp

*** Not included in the kit**

- 2. HydroBloom 8 mm dripline
- 3. Insert tee
- 4. Insert elbow
- 5. Insert coupling
- 6. Line end, 16 mm ring

Maintenance:

- Max. operating pressure: 2.0 bar
- Open the dripline ends and flush them regularly.
